

AESTHETICS WITH SPECIALISATION FINE ART

This programme offers a mix of practical art-making and theoretical art study. The specialisation courses will develop your fundamental skills and strengthen your conceptual and creative thinking. You will gain an understanding of the role of art in contemporary society as well as its historical contexts.

You will use this knowledge and understanding to develop your own creative identity, as well as

creating a portfolio and exhibition experience, which will prepare you for a future in the arts.

If you are considering a career in web design, industrial design, graphics, illustration, architecture, fine art, fashion, arts administration or even a career in teaching, then this is the programme for you.
