

# SOCIAL SCIENCE WITH SPECIALISATION SOCIAL SCIENCE

This programme will equip you with knowledge and understanding of culture and society at a local, regional, national and international level.

You will learn how Swedish society operated during critical historical periods and also continues to function in the contemporary world.

At IEGS you will study in a genuinely international environment with classmates who can discuss different perspectives on society, politics and economic structures. These can be explored and discussed with peers who have a wide range of social perspectives and backgrounds. This makes the IEGS social science programme an ideal opportunity to understand the subtleties of societies in 'real life'.
